Thank you for your purchase! Whether you bought this Rock Hard 4x4 product from one of our fantastic dealers or our factory direct team, we thank you for your business.

Rock Hard 4x4 is a family owned and operated business. We are headquartered in Saint Paul, Nebraska where we design, fabricate, and produce every single one of our products. Every single part we manufacture is 100% Made in the USA and exclusively in house by the Rock Hard 4x4 team.

We outsource zero processes.

To you, that means the product you are installing is the highest quality and longest lasting component on the market.

To us, that means you've selected a part we've spent years developing. Each Rock Hard 4x4 part has gone through more research and development and evolution than most people realize. While our parts may have the same striking look year after year, subtle revisions and refinements we implement maintain their status as the most durable and easy to install on the market.

We invite you to send us your feedback! Please email, call, write, or catch us on an off road trail near you to share your tales, share comments, and ask questions.

Thank you for your purchase! Please read all instructions carefully prior to beginning installation of your Rock Hard 4x4 product.

1. Remove vehicle top. If soft-top simply fold back – you do not have to unbolt hardware from rear 45-degree factory cage section.
2. Remove (lower) sound bar using 10MM socket. 2 bolts in each side mount, 1 bolt near each freedom panel hand bolt on either side of dome light.

PRO TIP: If you already have RH-1030 or RH-1030-1L Front Main Sports Cage Section installed, unbolt rear hardware (two bolts) from sound bar. RH-1030-A Rear Bars will mount ON TOP of front mounting plate.

3. Set front of rear cage bars (flat plate without downward bend) on top of sound bar. You'll notice a factory drilled hole on either driver or passenger side of top of sound bar. Use that hole as a guide to secure one side of RH-1030-A. Drill remaining hole. Secure with hardware but do not tighten at this time. You'll need some left and right adjustability to ensure rear mounting points are square.
4. Lay rear bar on top of factory padding on rear factory cage hoop.
5. Using sharp blade, trim padding where mounting plate will slip into padding.
6. Unzip rear cage hoop cover.
7. Slip RH-1030-A through cover and locate factory drilled hole in hoop. Use that as a guide to drill remaining hole.

Thank you for your purchase! Please read all instructions carefully prior to beginning installation of your Rock Hard 4x4 product.

8. Secure using supplied hardware. Tighten front section when you have verified RH-1030-A is square and centered with cage.
9. Zip factory roll bar cover.

CONGRATULATIONS! Now go wheel your rig with a whole new level of confidence and capability.

Please send photos of your install and wheeling adventures to pics@rockhard4x4.com. We love seeing our products on the trail!
